

Outstanding issues:

1. Font size display changes currently only affect the goal token font sizes displayed. Will be incorporated into other components as we progress through iteration 3.
2. B&W display of game characters is not showing and requires further configuration. Characters show up on the board but keep showing the color version and not the bw versions.
3. Load game button logic has not been implemented
4. Saving the game has not been implemented and so to go back to the main menu from within the game simply close the application.
