Participation Log for Iteration3-Fatema Haque

I worked on the code for the timer and then merged my code with front-end code for the Betting panel. I added more code to the BettingPanel to the further advance implementation of the BettingPanel so that it worked according to the instructions provided(NOTE: not all of my work was merged with existing code in time for submission).
I also worked on creating the ScorePanel.
I worked on the use case and sequence diagram for "Make a bid".
 I attended all the group meetings and tried to help out other group members whenever I could.
